

June 22, 2023

**TO:** THE DISTRICT BOARD OF TRUSTEES OF VALENCIA COLLEGE

**FROM:** DR. KATHLEEN PLINSKE  
President

**RE:** EDUCATIONAL PLANT SURVEY

The Educational Plant Survey includes a systematic study and evaluation of the College's existing educational facilities, and the identification of future educational facility needs required to accommodate educational programs and services for students. At least every five years, each Florida college district board of trustees arranges for a district-wide educational plant survey pursuant to requirements in Section 9 (d) of Article XII of the State Constitution, as amended, and Section 235.15, Florida Statutes (F.S.). The purpose of the plant survey is to provide a basis for the formulation of facilities plans to support the College's educational programs, student population, faculty, administrators, staff, and auxiliary and ancillary services for the following five-year period.

This Educational Plant Survey document is the report of findings of the survey for Valencia College conducted in April-May 2023. This survey incorporates recommendations for new construction, remodeling and renovation, and proposed future campus expansion for the period July 1, 2023, to June 30, 2028. In addition, the survey report satisfies the requirements of Section 1013.31, F.S. that articulates the need for College facilities to be established by such a survey.

**RECOMMENDED ACTION:**

The President recommends the District Board of Trustees approve the Educational Plant Survey dated June 22, 2023, as presented.

## RECOMMENDATIONS FOR EDUCATIONAL PLANTS

### VALENCIA COLLEGE

**Survey : 3 Version : 1**

**Date : 6/8/2023 11:01:47 AM**

The educational plant survey is a systematic study of present educational and ancillary plants and the determination of future needs. The survey is not directly concerned with the instructional program but the relationship of educational plants to the instructional program is such that judgments regarding the instructional program are necessarily a part of an educational plant survey.

The construction, remodeling, and renovation of educational facilities is a major undertaking. The educational plant survey aids in formulating plans for housing the educational activities of students and staff of the community college for the next several years and the survey considers the local comprehensive plan in its forecast strategies. This plan represents a careful study of all available data regarding the status of educational and ancillary facilities in relation to capital outlay full-time equivalency (COFTE) student membership and the projected changes in COFTE student membership. The intent of this educational plant survey is to ensure the thoughtful, orderly development of a program for providing educational and ancillary plants to house the educational and academic support activities of the college.

The recommendations in this educational plant survey furnish the foundation for a five-year plan for educational plants adopted by the Board of Trustees in accordance with §1013.31, Florida Statutes. Similarly, the recommendations serve as the basis for the proposed building program with projects listed in the order of priority submitted pursuant to State Requirements for Educational Facilities §2.1(5).

Educational plant survey cost estimates are determined based on cost factors that are 31 months (January, the midway point of the five-year survey period) from the official beginning of the survey period, which is July 1 of the first full year of the survey. The cost per square foot for new construction, remodeling, and renovation is based on actual statewide average construction cost data with a cost index increase applied to use the mid-point of the survey costs for planning purposes. The cost estimate process applies uniformly to all surveys in all colleges so that consistent planning can be made on a statewide basis.

Cost estimates for educational plant survey recommendations provide a general idea of anticipated costs and should not be interpreted as accurate estimates for particular projects. When educational plant survey recommendations become specific projects, professionals who can estimate the actual project costs based on current construction information must prepare the estimates.

The following table is a summary of square foot rates and cost estimates for the community college educational plant survey recommendations:

Recommendation Category	Cost per Square Foot	Estimated Cost
New Construction	464.00	36,231,440.00
Remodeling	232.00	2,648,280.00
Renovation	154.67	300,933,214.00
Site Recommendations		50,900,000.00
Estimated Total Survey Recommendation Cost		390,712,934.00

In addition, the educational plant survey provides six standard recommendations for college-wide application, as needed. The standard survey recommendations address general categories of physical plant needs that are likely to occur over time. No cost estimates are included for the standard survey recommendations.
